The BEAVER CONE

The Beaver Cone is a product that prevents beavers from plugging your culverts. It fits on existing culverts, it does not alter the streambed, it is easy to install and maintain, sizes range from 12" to 84" diameters; they can be installed with a couple of people and minimum equipment. The Beaver Cone is patented in the U.S. and Canada. The cone is fabricated out of heavy duty steel and powder coated to last. Before ordering your Beaver Cone please provide us with the outside diameter of your culvert to ensure ample clearance to fit and make installation as easy as possible.

****Please call your St Regis Representative for pricing and availability.
