## St. Regis Culvert's Camp Fire Rings

St. Regis Culvert, Inc. is a manufacturer of corrugated steel pipe and related drainage products. We have a full line of complementary products such as steel and aluminum structural plate for bridge replacements, detention and retention structures, water control gates, grader and snow plow blades, guard rail, plastic pipe, geo-textile fabrics and Snap-Tite culvert liners.

St Regis Culvert's Campfire Rings have a rolled safety edge and are available in the following standard dimensions (diameter x height):

24" x 12"      30" x 12"      36" x 12"      42" x 12"      48" x 12"

Larger diameter and deeper fire rings can be manufactured to order. We also have available 5', 6' and 7' diameter corrugated steel pipe in a variety of short lengths. They make excellent feed bins, small animal shelters, compost containers and caissons. St Regis also manufactures custom egress window wells and other corrugated steel structures.

We appreciate your time and look forward to doing business with you. Please call 800.527.4604 for further information and pricing.
