

Rat Guards™

Avoid irritating and costly plugged drainage systems with clear zinc die chromate plated mild steel, stainless steel, and powder coated band type Rat Guards!

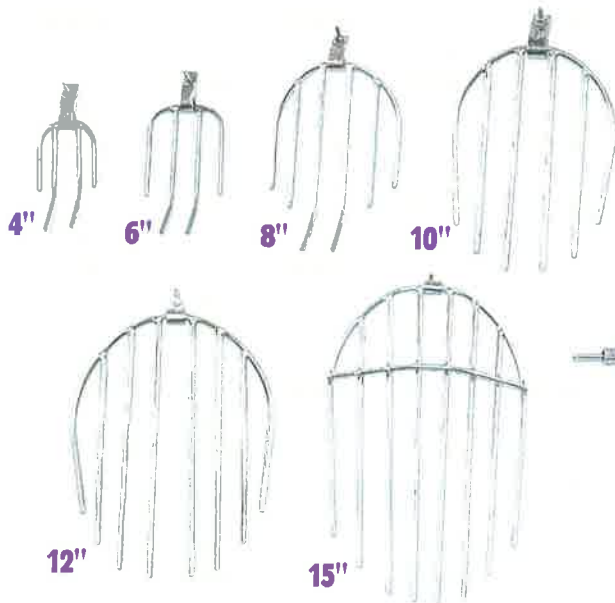

Rat Guard, Stainless Steel

- Easy to install.
- Resists rust and corrosion.
- Stainless steel material provides extended life cycle.
- Available 4" through 24".

Rat Guard, Mild Steel

- Clear zinc die chromate coating resists corrosion.
- Easy to install. Position far enough in the pipe to allow it to swivel up and let trash pass without exposing the Rat Guard beyond the pipe.
- 18" through 60"—steel bars are attached to a square steel frame. The Rat Guard is held in place with a steel rod extending through the frame and then through the pipe on either side by approximately 1".
